

# WE TRAIN IT ONLINE LIVE

## BENEFITS:

- Classes are always guaranteed to run
- Same instruction as classroom learning
- Flexible scheduling and availability of all courses
- Collaborative learning
- Reinforce knowledge transfer
- One-on-one Instructor
- Interactive
- Access to virtual labs, also after finishing the course
- Multi-sensory learning approach
- Measurable progress

## An effective and efficient approach to learning

Online LIVE offers comprehensive training that prepares employees with knowledge and skills for meeting the high demands of training in the workplace. Our Online LIVE training incorporates the same highly qualified instructors, approved courseware and outstanding support that our students are accustomed to receiving from our center with a distance approach to learning. We have designed training programs that have minimal impact on your schedule, save you time away from the office, and eliminate the expenses associated with travel without sacrificing a LIVE learning environment.

### A flexible learning approach

Like our traditional classroom learning, the Online LIVE learning model allows students to learn from expert instructors, access live, hands-on labs and use authorized vendor curriculum. The only difference recognized with this learning model is that the student is not in the classroom with an instructor, but attends class from a remote location.

### Flexible scheduling

Flexible course schedules allow the student to determine when they attend training. The training schedule can be built around a work schedule so productivity in the workplace is maintained.

### The learning experience

Online LIVE classes follow the same framework as our traditional instructor-led training. Using lecture, demos and freehand diagramming, our certified trainers provide instruction through our collaborative eLearning platform. All students are issued low-noise headphones with microphones, and may freely participate in discussions with the instructor, or with other students by voice or through text-chat. VoIP technology allows for clear, uninterrupted voice communication. Students apply what they learn in lecture by working on hands-on labs in a virtual environment. During their lab practice, the instructor can provide one-to-one mentoring, using remote sharing technology to view and manage the student's computer.

### Online LIVE learning benefits for the student

- LIVE access to qualified instructors with industry knowledge and experience
- Participation in a LIVE classroom environment with instructors and fellow students
- Convenience of flexible course schedules and the ability to attend the course from anywhere with internet access
- Blending lecture, hands-on practice and instructor interaction creates the most stimulating and effective learning environment possible
- Practice labs in a virtual environment for hands-on experience
- Ability to playback any class for review, or absence, through archived recordings of Online LIVE classes

### Online LIVE learning benefits for the corporation

- Maximize productivity and budgets by reducing training travel, facilities and telecommunication costs
- Ability to provide uniform instruction and content to a geographically dispersed workforce
- Pre- and post-assessments track progress and gauge return on investment
- Authorized vendor courseware is used to ensure proper skill development

### NetPro Group combines multiple learning methods for more effective results

NetPro Group will bring immediate value to your organization through our Integrated Learning approach, which encompasses more than just "taking a class". It's a complete method of training, reinforcing, supporting and validating learning through flexible delivery options including the well-known Classroom Learning or the Online LIVE Learning method.

### Learn from the leader

Since 1997 NetPro Group has an official certified Training Center, which in 2011 engaged a partnership with the world leader in computer training; New Horizons. They bring with them over 25 years of experience, 300 training centers in 60 countries, and more than 2,400 instructors.
